WE BUILD

In partnership with  SunEdison®

WE BUILD

NATIONAL **WOMENINSOLAR** INITIATIVE

GRID Alternatives is leading a **National Women in Solar Initiative**, in partnership with SunEdison, to bring more women into the solar industry and support them in their professional advancement. Solar jobs are growing by 20% a year, and women's voices, talents and leadership are needed more than ever to build a strong and sustainable industry. **Join us!**

Get on the roof: A great first step for women interested in solar is to volunteer with GRID. No experience needed!

Become a team leader: Women who want to take it to the next level can gain more skills, develop their leadership potential, and access solar job opportunities through our Team Leader program.

Participate in a women's build: "We Build" events given women the chance to network with their peers while getting hands-on with solar. Contact your local GRID office to join one of our teams or organize your own.

Attend our webinars: Learn from solar women what it's like working in different parts of the industry, from construction to tech to executive leadership.

Work at GRID: Our year-long SolarCorps program helps fellows build solar career experience in a variety of roles at GRID.
